## WHAT'S NEWEST **AND BEST**

### THE BEST PRODUCTIVITY

- EU STAGE-V Engine
- Vertical Lift Path
- Auto Self-Leveling System
- Two Speed Travel
- High-Flow Hydraulic System Option
- Multifunction Lever

## **EASY CONTROL AND COMFORTABLE OPERATION**

- Excellent Visibility
- Outstanding A/C Performance
- Foot Pedal & Rotary S/W
- Spacious Cabin
- Easy Open/Close Sliding Door
- LED Working Lights
- Ride Control System
- Canopy (ROPS/FOPS) Option

## THE ULTIMATE SAFE **ENVIRONMENT** • Rear View Camera Escort System • Emergency Boom Down • Emergency Escape

**HD HYUNDAI** HT100V **3** 

#### HIGH-FLOW HYDRAULIC SYSTEM Option

The high flow function is a necessary option to use attachments that require high hydraulic flow. This option increases the auxiliary hydraulic flow rate from 82.9lpm(21.9gpm) to 128.8lpm(34gpm).

The coupler manifold includes both 1/2" and 3/4" couplers.

#### **MULTIFUNCTION LEVER**

The ergonomically designed joysticks allow the operator to control all major machine functions with their hands only. It greatly reduced the fatigue of the operator when control machine and attachment.

▶ Right Control lever (Boom&Bucket)
Lever button operation

- 1. AUX electric mode activation button
- 2. AUX port : Male coupler port
- 3. 14-pin power supply-E
- 4. 14-pin power supply-F
- 5. AUX port : Female coupler port 6. AUX jog dial
- ▶ Left Control lever(Driving)
  Lever button operation

- 1. 14-pin power supply-G
- 2. 14-pin power supply-H
- 3. Ride Control
- 4. Horn button
- 5. 14-pin power supply-C
- 6. 14-pin power supply
- 7. 2-speed button

#### **▶ EU STAGE-V Engine**

'Hyundai 4HTI5 / 4HTI4' engine meeting Euro STAGE-V / EPA Tier 4 Final emission regulations are designed for the best productivity. The engine provides enough power for jobs of all types with either a bucket or special attachment.

The vertical lift path is the load was being lifted vertically. The geometry of the arm allows the boom to raise the bucket straight up to full height.

The vertical lift path has better stability, greater lift height, and better operating capacity than the radial lift path.

#### ▶ Auto Self-Leveling System

The auto self-leveling system keeps the bucket or fork level without the need to manually adjust the angle on the way up during lifting and this feature can be engaged with the flip of a switch.

#### ▶ Two Speed Travel

This function provides two travel speeds for standard, so the speed can be selected according to the needs of the site and the operator's preference. This feature helps save time by moving faster and completing jobs quickly.

HT100V 5

#### **▶** Excellent Visibility

The wide front window gives the operator an excellent view of buckets or attachments. The visibility of window on the roof of the cabin also provides the operator a clear view when raising a load above the cabin.

#### ▶ Outstanding A/C Performance

Optimized airflow through five vents provides outstanding cooling and heating throughout the year. It also prevents fog or frost on the windows in cold weather, so as not to interfere with the work.

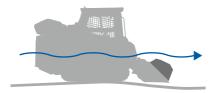

#### ▶ Foot Pedal & Rotary S/W

Engine speed can be controlled by the rotary s/w and the foot pedal during operation. The rotary s/w is suitable for tasks that required constant engine speed. The foot pedal is suitable for tasks that required RPM change.

#### ▶ Ride Control System

Ride control system reduces operator fatigue and material spillage during operation. An accumulator helps to minimize shock, giving the operator a much smoother ride.

Ride Control "ON"

Ride Control "OFF"

#### **SPACIOUS CABIN**

This cabin provides a wide indoor space. It minimizes fatigue even for work long time.

## EASY OPEN/CLOSE SLIDING DOOR

The sliding front door can be easily opened and closed without any effort. And the loader can operate regard -less of whether the door is opened or closed. You can work with the front door open.

#### **LED WORKING LIGHTS**

Bright and long-lasting LED lights are applied to the front side(2EA) and rear side(2EA) of the cabin for standard.

# EASY CONTROL AND COMFORTABLE OPERATION

Many convenience functions are concentrated in the most convenient spot for operators to improve work efficiency. And easy control functions provide both productivity and comfort to operators while working. SSL/CTL series is designed with the operator in mind.

HT100V 7

#### ▶ Rear View Camera

The rear camera provides the operator with a rear view when traveling or working. The camera screen is displayed on the cluster and automatically changed to the camera screen when traveling backward.

#### **▶** Escort System

When the engine is turned off, the working lights of the front and rear are turned on for 30 seconds at the night. It has set up an environment where operators can get off safely at night.

#### **▶** Emergency Boom Down

If the boom fails to descend due to a failure of the electrical system, it can manually descend through the boom down button at the bottom of the operator's seat.

#### **▶** Emergency Escape

In an emergency, if an operator inside the cabin is unable to escape through the front door, it can escape through the rear window.

#### **▶** Control Interlock System

Traveling and working devices can only be operated with all seat bars lowered to prevent accidents in unintended situations, such as accidentally touching joysticks.

#### ▶ Main Disconnect S/W

The main disconnect switch prevents battery discharge during long-term storage. After power is cut off, theft prevention and unintended operating may be prevented through a switch knob separation.

HT100V 9

# **RELIABILITY AND VERSATILITY**

#### **AIR INTAKE FOR ENGINE**

The upper protection cover blocks the inflow of rainwater and dust to prevent contamination and corrosion of a condenser and parts inside the

#### **DUAL AIR-CLEANER ELEMENTS**

The dual air-cleaner elements are applied to the engine filter. This can filter out dust from the air and supply only fresh air to the engine.

## MAIN FRAME AND UNDERCARRIAGE

Undercarriage is fully welded to the main frame for the ultimate durability.

#### **WIDE RUBBER TRACK**

400mm wide rubber track is applied as standard. This feature has high stability due to wide contact area and is easy to work on soft ground.

## **ATTACHMENT**

**Bucket** 

**Sweeper** 

Pallet Fork

#### ▶ Hydraulic Quick Attachment → 14 Pin Elec. Connector

Operator can change the attachment quickly by operating the hydraulic cylinder with a button without leaving the seat and worring about injury. An hydraulic attachment coupler increases uptime and productivity on the jobsite by allowing operators to exchange attachments quickly and

The 14 pins electrical connector is applied to control various attachments.

## HIMXTE

## IT'S CONVENIENT, EASY AND VALUABLE

Hi MATE Hyundai's newly developed remote management system, utilizes GPS-satellite technology to provide customers with the highest level of service and product support available. Hi MATE enables users to remotely evaluate machine performance, access diagnostic information, and verify machine locations at the touch of a button.

#### WHAT IS BENEFITS

#### **Increase Productivity**

It helps you operate machines in efficient. You can check the difference between total engine hours and actual working hours. See how productive your machines are and plan any required cost saving solutions. Hi MATE offers working information such as working / idling hours, fuel consumption and rate.

#### Convenient and Easy Monitoring

There is nothing much to do to monitor your machines. Just log on to the Hi MATE website or mobile application. Hi MATE allows you to watch your machines whenever and wherever you are.

#### Security

Protect your machines from theft or unauthorized usage with Hi MATE. If the machine moves out of the Geo-fence boundary, you will get alerts.

#### > Fully Openable Rear Door

The rear door can be opened easily. And the radiator module is applied swing out type. It provides easy access to the engine compartments, hydraulic filter, ECU and etc.

#### **▶** Easy Battery Replacement

With easy battery replacement, the machine can be managed more easily.

#### **▶** Fully Openable Tilt-up Cabin

Tilt-up cabin can be fully opened without having to lift the arm, allowing easy access and maintenance.
